POSITIONING

The label uploads beating their averages are not the expensive ones. Official visualizers, lyric videos and lyrics uploads outperform on channels from 1,880 subscribers to 2.3 million, and a 13,300-subscriber independent label got 1.6 million views on a live recording. The music video still breaks out at scale, but the formats that break out at every scale are the ones a label can make for every track.

The mechanism is search. Fans type the song plus lyrics, the song plus live, the artist plus visualizer. Whoever uploads the official version of each owns that search. Third-party lyrics channels currently take most of it; the Rema lyrics upload below did 4.4 million views on a channel that is not the label.

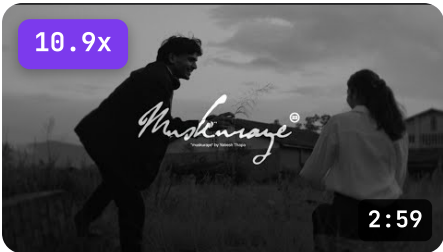

Five uploads per single, not one

A release cycle that ships one music video leaves four searches to other channels. The outliers show the visualizer, the lyric video, the lyrics upload and the live version each beating channel averages on their own. Ship all five per single, titled artist, song, format, official.

What is going viral in label releases and visualizers right now

Outlier releases from labels and artist channels of every size, pulled from OutlierKit

Each x is how far the video beat its own channel's normal views. The format is in brackets in nearly every title, because the format is what the fan searched.

**Yabesh Thapa - Muskuraye I
OFFICIAL VISUALIZER**

Yabesh Thapa · 633K subs · 2.2M views · Nov 2025

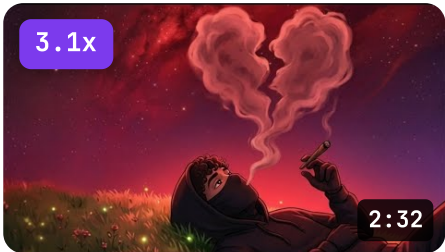

An official visualizer did 2.2 million views, 10.9x the channel's norm. A visualizer costs a fraction of a music video and still carries the release.

**A Woman Like You "Lyric
Visualizer"**

Jay Hooks Band · 37.7K subs · 267K views · Oct 2025

Lyric visualizer on a 37K band channel, 2.9x. The lyrics keep the viewer on the video, not on a lyrics site.

**Wondering Why (Lyric
Visualizer)**

48Lonely · 9.7K subs · 104K views

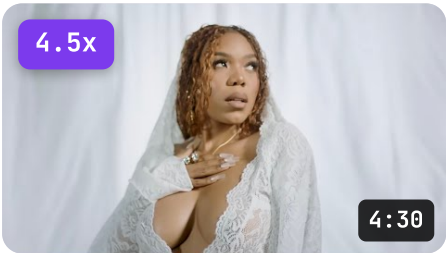

A 9,660-subscriber act got 104,000 views on a lyric visualizer. 3.1x; the cheapest format that scales.

Clean Slate Lyric Video

Faith Cometh By Hearing · 30.5K subs · 10K views

Lyric video on a 30K channel, 7.2x. Same mechanism in a different genre.

**Elaine - Love Me Slowly (Official
Visualizer)**

Elaine and Major League DJz · 318K subs · 329K views

Official visualizer plus a named artist, 4.5x on 318K subscribers.

**Movements - "Where I Lay"
(Official Lyric Video)**

Movements · 64K subs · 267K views

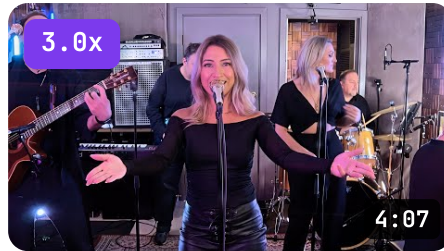

Official lyric video from a 64K band, 3.8x. The label's lyric video beats fan uploads when it is marked official.

BIJAL - Summer Glow [Official Lyric Visualizer]

BIJAL · 13.8K subs · 62K views · Sep 2025

Official lyric visualizer on a 13,800-subscriber act: 4.5x. The two words together own both searches.

'Rolling in the Deep' (Adele) Live Studio Performance I Sing It Live

Sing it Live · 306K subs · 384.7K views · Jul 2025

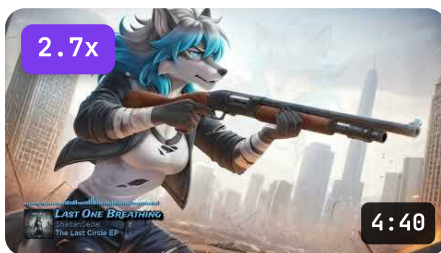

A live studio performance of a famous song, 3x on 306K subscribers. Cover plus live is a catalogue lane.

Jkyl & Hyde - Sensory Session (lyric video)

Jkyl & Hyde and Nikita, the Wicked · 26.7K subs · 615K views

Lyric video, 615,000 views, 3.9x on 26K subscribers. The visual is simple; the song and the words do the work.

Last One Breathing (Lyric Video)

ShaitanSedai · 1.9K subs · 4.1K views · Jan 2026

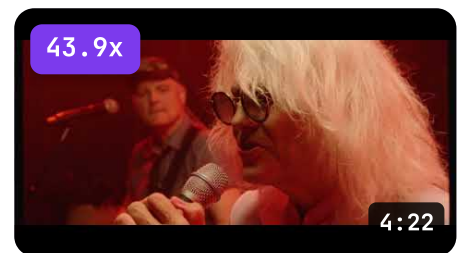

A 1,880-subscriber act got 4,129 views on a lyric video: 2.7x. The format works before an act has an audience.

Rema - Calm Down (Lyrics)

Moonshine · 240K subs · 4.4M views · Mar 2026

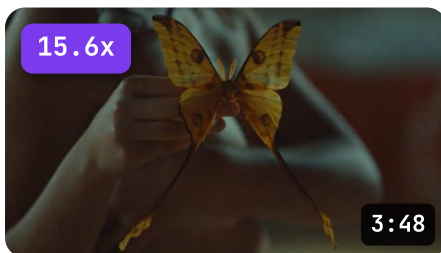

A lyrics upload of a hit did 4.4 million views on a 240K channel: 16.7x. Lyrics is the biggest search in YouTube music, and labels leave it to third parties.

Michele Bettencourt and Vampire Time - Everybody Loves A Circus (Live)

Licorice Pizza Records · 13.3K subs · 1.6M views · Sep 2025

A 13,300-subscriber independent label got 1.6 million views on a live recording: 43.9x. Live plus the song title is the format small labels win with.

The Plot In You - Spare Me (Official Music Video)

Fearless Records · 2.3M subs · 809.8K views · Dec 2024

Official music video on a 2.31M label channel, 15.6x. Even at scale the release that breaks out is titled artist, song, official.

The patterns behind these numbers

- **Format in brackets.** (Official Visualizer), (Lyric Video), (Lyrics), (Live): the bracket is the search.
- **Official beats unofficial.** Marked-official lyric videos out-pull fan uploads when both exist; unmarked ones lose to them.
- **Lyrics is a lane labels ignore.** The biggest view count in the set is a plain lyrics upload by a third party.
- **Live is the small-label format.** One live recording did 43.9x on a 13,300-subscriber independent.
- **The visualizer carries the release.** 2.2 million views on a visualizer, 10.9x, at a fraction of a video budget.

THE SLATE

Your first 10 videos

Each one built from a proven outlier pattern, in the order to film them

Ideas one to five are the five uploads for the next single, in release order. Six to eight are catalogue back-fill. Nine and ten are the session series and the flagship video.

1

[Artist] - [Song] (Official Visualizer)

OPEN WITH

Release day: the visualizer goes up first, with the artwork moving and the song complete. It is the upload that carries the release for the first week.

How to sequence this

For the next single, ship ideas one to five over two weeks in that order: visualizer on release day, lyric video on day three, lyrics upload the same week, live in week two, and the lyric visualizer variant for any act with no audience yet. Six to eight are a weekly catalogue slot that never stops. Nine is a session series with its own name. Ten is the flagship, released when the search is already built. Cut a Short of the chorus from every upload with the full track linked.

How to read the numbers. Every “x” is that video’s views divided by its own channel’s typical views, so a 10x video did ten times better than that channel normally does. Small channels are included on purpose: they show which topics pull viewers who have never heard of the creator.
